Building 77L, Code 1412  
United States Naval Base  
Philadelphia, Pennsylvania 19112

Attention: Mr. Brian Helland

Reference: CLEAN Contract No. N62472-90-D-1298  
Contract Task Order (CTO) 0031

Subject: Final Site Characterization Report and DICAR Summary  
Underground Storage Tank Investigation at Building C-17  
Colts Neck, New Jersey

Dear Mr. Helland:

HALLIBURTON NUS Environmental Corporation is pleased to submit to you the Final Site Characterization Report and DICAR Summary ahead of schedule. (The deliverable date for the subject report is May 29, 1992.) Please find attached one complete set of the subject report. As requested in the statement of work for CTO 0031, three sets have been transmitted to the Commanding Officer at NWS Earle under separate cover. With the submission of the subject report, all deliverables for CTO 0031 have been transmitted as per the statement of work.

The review comments transmitted to me by John Pawlus, of NWS Earle, on May 7, 1992, and you, on May 11, 1992, have been addressed, and the appropriate information and changes have been incorporated into the subject report. As per our telephone conversation of April 17, 1992, a copy of the data packages generated for the three sampling events has been included in your set of the subject report and in one of the three sets transmitted to the Commanding Officer at NWS Earle. A copy of the data packages generated for the three sampling events, excluding laboratory quality assurance and quality control information, has been included in the remaining two sets transmitted to NWS Earle.

I am also forwarding three copies of the signed Site Assessment Summary Form returned to me by the Commanding Officer at NWS Earle. In addition, I am returning your copy of the Final Site Characterization and Plan of Action for Underground Storage Tanks at Building S-106 and Quarters G, NWS Earle, Colts Neck, New Jersey, prepared by Kaselaan and D'Angelo Associates, Incorporated.

Please contact me at the above number with any questions or comments concerning CTO 0031.

Respectfully,

Jill Hartnell, CPG  
Project Manager
